

MillerGrid

Parts for mills that never stop

COMPANY PROFILE

2026 EDITION

ABOUT OUR COMPANY

Expertise You Can Trust

Millergrid Limited is built on years of deep industry experience in Kenyan industrial engineering. We deliver world-class pneumatic systems, automation components, and bearing solutions that millers depend on every day.

Our focus is simple: supply the right parts, at the right time, so your operations never stop. As an authorized distributor for world-leading brands Festo and SKF, we bring global engineering excellence to the local milling floor.

We believe efficient milling means more than productivity—it means food security, job creation, and better lives for Kenyan families. That is why we combine technical expertise in mechanical and electrical systems with deep understanding of what local millers actually need. Every component we supply, every solution we provide, moves Kenya's milling industry forward.

VISION

To be Kenya's most trusted partner in milling automation, recognized for setting the gold standard in technical reliability and engineering excellence.

MISSION

To keep Kenya's mills moving by delivering high-performance components and expert technical solutions that maximize yield, eliminate downtime, and ensure food safety through integrity and innovation.

CORE VALUES

✓ Uncompromising Integrity

We believe in parts you can trust. Every component we supply and every piece of advice we give is rooted in honesty and quality.

✓ Precision & Performance

We don't settle for "good enough." We focus on technologies that refine processes and optimize resources.

✓ Innovation in Motion

Industrial needs change fast. We stay ahead of the curve, constantly finding simpler, smarter ways to solve engineering challenges.

✓ True Partnership

Your success is our success. We work as an extension of your team to ensure long-term operational excellence.

PRODUCT PORTFOLIO

Millergrid Limited offers a comprehensive and multidisciplinary supply program specifically engineered to enhance the operational reliability and technological capacity of grain processing facilities.

Our technical range extends beyond standard industrial supplies to include specialised milling-specific machinery spares and high-durability wear parts designed to maintain peak extraction rates and consistent grinding quality.

This is complemented by a robust selection of sieving and filtration media essential for maintaining the highest hygienic standards and product purity.

Our service portfolio also encompasses the supply and maintenance of industrial air compressor systems and components, supporting the pneumatic infrastructure essential to modern grain processing operations.

Furthermore, we provide integrated solutions for electrical distribution and motor protection, alongside essential industrial hardware and maintenance consumables, ensuring that millers have access to a single-source partner for every stage of the production cycle.

✓ Precision Bearings (SKF Range)

These parts are essential for reducing downtime and maintaining the structural integrity of rotating equipment.

SKF Bearing 23218
CCK/C3/W33

SKF Bearing 6209-2Z/C3

SKF H308 Adapter Sleeves

SKF 2215EK

SKF KR52PPA

Specialized Housings

Back Stop Bearing

SKF Bearing SIKAC 14 M

SKF Bearing YAR 209-112-2F

Sprockets (BS & ANSI
standards)

Industrial Chains (BS &
ANSI standards)

Shaft Couplings (Jaw, gear, and
chain types)

Pneumatics and Valves(Festo Range)

These components allow for the precise, automated control of grain movement and gate operations through advanced air-driven systems.

Valve Terminal

Pneumatic Cylinders.

Air Preparation Units (Filters, regulators)

Pneumatic Actuators.

Solenoid Valve

food-grade Fittings

Air preparation units (Filters, regulators, and lubricators)

Proximity Sensor

Solenoid Valve SXE9673-179-00

Limit Switch

Silencer

Pneumatic Guided Cylinder

2-way PU Pneumatic Fittings

Burkert Solenoid Valve

Belts & Power Transmission

High-performance industrial belts for efficient power transmission and reliable equipment operation

1552 S8M 30PK

SPB 1700 Fenner

SPB 1600 Fenner

Timing Belt ISORAN Endless

1778-RPP14-40 Megadyne Isoran
Metric Timing Belt

22DPL 1765

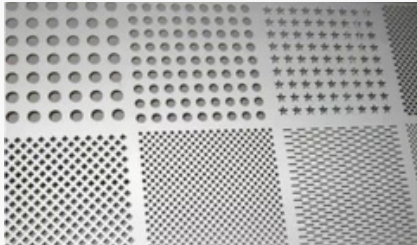

SPA 1900

SPA 1700

✓ Sieving, Filtration, and Fabric Solutions

Essential meshes and fabrics used to sort grain streams and maintain clean, dust-free air.

Perforated Sheets

Sefar Sieves

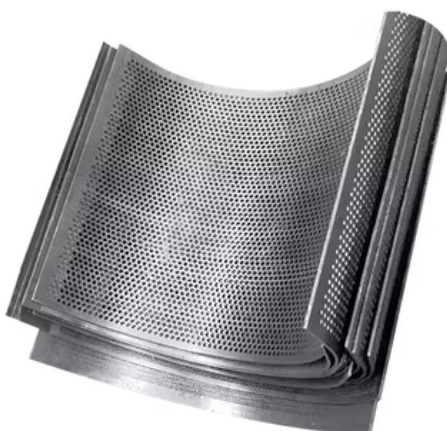

Sefar Quicktal Spray

Sefar Quicktal Adhesive

Sieve Cleaners

Scourer Screen Mesh

Engineering Felt Material

Filter Sleeve

✓ Sensors & Safety

These parts ensure that conveyors and elevators operate at peak capacity with minimal product loss.

Rope Type Sensors FTC 262

Inductive Sensor IG51A

Capacitive Sensor KI505A

IFM Diffuse Reflection Sensor 06H301

Sensor KB5062

Sensor IG5318

Proximity Sensor PZ-V32P

Schmersal RSS Safety Sensor

Electrical Controls and Instrumentation

This category provides the hardware necessary to manage the mill's power distribution and monitor process variables, ensuring energy efficiency and motor protection.

ABB AF30-Pole Contactor

Schneider Circuit Breaker

Siemens Starter DSI-X

ABB A9-30-10 Contactor

Electric Timer for Solenoid Valve

Overload Relays

Time Relay (OMRON)

Siemens SITOP PSU300S

✓ Maintenance & Lubrication

We supply professional-grade consumables and tools required for daily upkeep and hygienic maintenance.

RTV Silicone Sealants

Fasteners

Shell Gear Oil 220

Food-Grade Oil

SKF Bearing Grease

SKF Chain Lubricants

Tape Dispensers

Anti-seize Compounds

Spring Kits

Seal Repair Kit (CS95-63)

O-rings

Circlips
